Description:

AEDP UICW Construction

Summary:

The UICW project involves the expansion or enhancement of existing and newly proposed utilities to meet the growing demands of the airport. The project encompasses utility systems including reclaimed water, storm drainage, water quality pond/deicing pond, detention pond, hydronic piping (chilled and hot water), AUS medium voltage electrical power distribution center, ductbank and electrical distribution system, redundant electrical duct banks, information technology/telecommunications duct banks, and other utility extensions that may be identified as the AEDP program progress and their seamless coordination with other AEDP facilities projects.
